Module category

- FTP Fundamental theoretical principles
- TSM Technical/scientific specialization module
- CM Context module

Lessons

2 lecture periods and 1 tutorial period per week

Entry-level competencies**Prerequisites, previous knowledge****Brief course description of module objectives and content**

The focus of the module is on the various logistics strategies and structures in the international environment, and especially on the different types of transport. In addition, the increasing importance of logistics within globally operating companies is examined and the latest trends in international logistics analyzed.

Aims, content, methods**Learning objectives and acquired competencies**

- The module provides the necessary knowledge to understand the variety of possible logistical concepts. The students will be able to derive the correct strategies from given targets, design a possible operating strategy for the planned issue and balance this with the capabilities of the solution found
- This will be achieved through the knowledge of strategies, structures and technical elements, based on the design principles of different procurement and distribution needs of multiple branches
- Corresponding exercises will deepen the lecture content through examples and tasks; in addition, a group assignment must be presented.
- Logistics experts present interesting case studies from real life

Contents of module with emphasis on teaching content

- Models and concepts of international logistics
 - Strategies, Risks, Manageability & Controlling, Interfaces internal/external logistics & to 3rd parties, Structural elements of warehousing & transportation networks (national / regional / global)
- Technical elements of warehousing and transport (central point: traffic logistics)
 - Rail, Road, Air, Sea
- Rules & Regulations in international logistics
 - Safety, Regulatory, Dangerous goods, Important international organizations, Customs...
- Understanding logistics as a core competence of internationally operating companies
 - Understanding logistics as a differentiating factor
 - Recognizing the increasing importance of international logistics for economic success

Teaching and learning methods

- Lectures / presence
- Tutorial / presence
- Group assignment / presence, self study

Literature

- Logistics & Supply Chain Management, Martin Christopher, Fourth Edition, 2011
- Exercises will be delivered during the course

Assessment**Certification requirements for final examinations (conditions for attestation)**

Presentation of the group assignment

Basic principle for exams:

All the standard final exams for modules are written exams.

The repetition exams can be either written or oral.

Standard final exam for a module and written repetition exam

Kind of Exam	written
Duration of exam	120 minutes
Permissible aids	<input type="checkbox"/> no aids <input checked="" type="checkbox"/> permissible aids: <input type="checkbox"/> Electronical aids: _____ <input checked="" type="checkbox"/> Hardcopy form: open book <input type="checkbox"/> _____

Special case: Repetition exam as an oral exam

If an oral exam is set (only possible for ≤ 4 students), the following applies:

Kind of Exam	oral
Duration of exam	30 minutes
Permissible aids	no aids
